How Saama Applies AI/ML to Your Data

Saama uses AI/ML to...

- Aggregate data
- Spot missing or duplicate data
- Write queries
- Map complex data
- Identify adverse events
- Spot potential early withdrawals
- ...and more

Only Saama can Accelerate Your Trials from Day One

AI models take years and millions of data points to train accurately. Unlike competitors who are just now investing in AI, Saama has 10+ years of AI research with 90+ models trained for life sciences on over 300 million data points. This allows Saama to deploy models into your study environment, out-of-the-box, today.
