# Unrivaled Visibility into Trial Operations

About

Operational Insights allows you to quickly centralize and visualize trial operations in real time. 50+ KPIs and 150+ analyses, built into the system, let you easily set up role-specific, interactive dashboards for executives, study managers, site monitors, and more. With everyone viewing the same data in real time, you can improve decision-making, resolve issues sooner, and accelerate your time to market.

Portfolio dashboard

Benefits

Increase Collaboration and Transparency

- All team members working from the same, most up-to-date data
- Easily set alerts and assign tasks

Quickly Identify and Mitigate Risks

- See protocol deviations, missing data, and other risks faster
- Real-time monitoring helps you fix issues as soon as you find them, accelerating time to database lock

Monitor Site Performance in Real Time

- Interactive visualizations to quickly identify and remove hurdles
- 50+ built-in KPIs make performance measurement simple

Simplify Vendor Management

- Centralize data across vendors and easily track performance

Features

Gain complete visibility into your trial operations, increasing collaboration and accelerating time to market.

Portfolio Dashboards
View insights across all studies and sources — including clinical, operational, and financial data — from a single location.

Study and Country Analytics
Perform study and country-level analytics on milestone cycle times, operational challenges, quality indicators, and more to identify and remove barriers to enrollment and database lock.

Trends
Visualize trends over time for key indicators such as enrollment, site status and issues. Track trial progress in real time and monitor the effects of any corrective actions taken.

Listings
Drill down from dashboards and visualizations — right to listings — and view the exact data point you're looking for.

Pre-Built KPIs and Analyses
50+ KPIs and 150+ analyses pre-built into the system, accelerating set-up and minimizing custom builds.

Configurable Visuals and Dashboards
Easily configure visuals and dashboards "out-of-the-box" to fit your needs. No custom report builds or maintenance required.

Assign and Track Tasks
Users can assign tasks directly within the system. Any assigned task is automatically tracked, so users can ensure any assigned task is actioned.
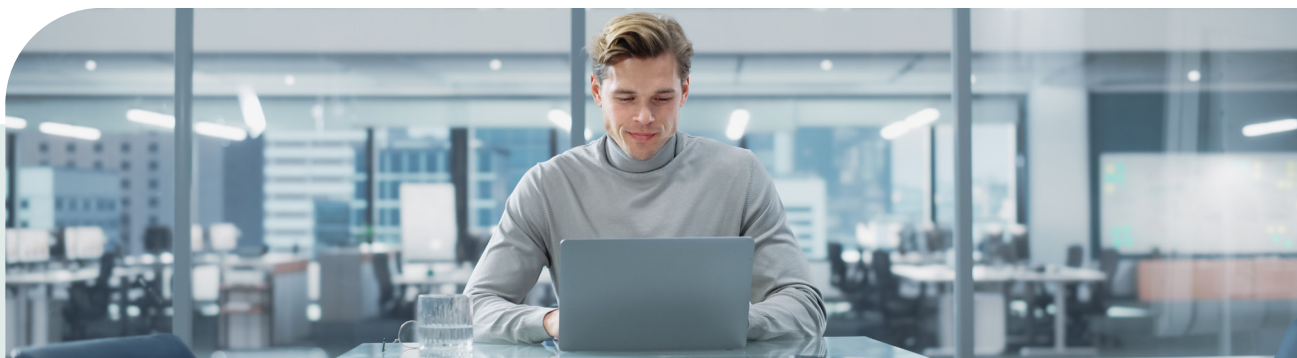

Set Thresholds and Notifications
Set thresholds and notifications for KPIs, allowing for real-time KPI monitoring.

The Saama Difference

Only Saama's Operational Insights can provide a holistic view of your trial operations, in real time, to all team members. It seamlessly integrates and visualizes clinical, operational, and financial data — including EDC, CTMS and eTMF data — in a single location. Improve decision-making, resolve issues faster, and accelerate your time to market with Saama.
